B.C.A. SEM - 2

PRACTICAL ASSIGNMENT (PHP)

[Submission Date : 10/02/2025]

Q – 1) Create a database **std_mgt_sys**

Into the above database create a table structure as mentioned bellow :

Table : std_registration

Create the following columns into the table using appropriate data-type and size.

Id(auto increment), first_name, last_name, data_of_birth, stream, semester, address, city, pin, contact_number, email

Q-2) Write PHP code which allow the registration of the students.

Q-3) Write PHP code to display all the registered students.

Q-4) Allow the students to display his/her detail by entering the id and mobile number.

Q-5) Allow the delete operation to remove the record from the above database

Q-6) Allow the update operation to edit the record into the above mentioned database

#Note : Use proper user interface where-ever required
